

SCREENING INTEGRATIVE HEALTH REPORT FOR **BUSINESS, ENGINEERING AND ORGANIC AGRICULTURE STUDENTS**

Integrative Health Center
2024 - 2025

Purpose:

Most university students belong to young adulthood with age ranges between 18 – 26 years old. Many reports identified this phase as biologically, and psychologically stage that influences university students' attitude and decision-making. According to previous reports, there is a high prevalence of risky behaviours among college students, such as eating disorders, anxiety, and depression, as well as tobacco/ vaping products usage. Accordingly, our aim is to implement holistic health screening for students at Heliopolis University for Sustainable Development regardless their faculty or study level. A self-completion questionnaire was administered through Computer-Assisted Group Interviewing about health, lifestyle and dietary habits as well as self-evaluation.

Total number of Students screened in different faculties:

Faculty	Number of Students
Engineering	35
Business and Economics	32
Organic Agriculture	134

Comment:

The Faculty of Organic Agriculture has the highest student enrollment, while Engineering and Business have significantly fewer students. This indicates a greater interest or focus on Organic Agriculture.

I. Demographic information:**1. Gender:**

Faculty	Female (%)	Male (%)
Business and Economics	53.10%	46.90%
Engineering	25.70%	74.30%
Organic Agriculture	62.70%	37.30%

Age Range	Business	Engineering	Agriculture
18–20	68.80%	68.60%	61.20%
21–23	25.00%	22.90%	37.30%
>23	6.30%	8.60%	1.50%

Comment:

Organic Agriculture has the highest female representation (62.7%) and overall student count. Engineering is male dominated (74.3%), while Business shows a more balanced gender distribution. This reflects varying gender trends across faculties, with Organic Agriculture attracting more female students.

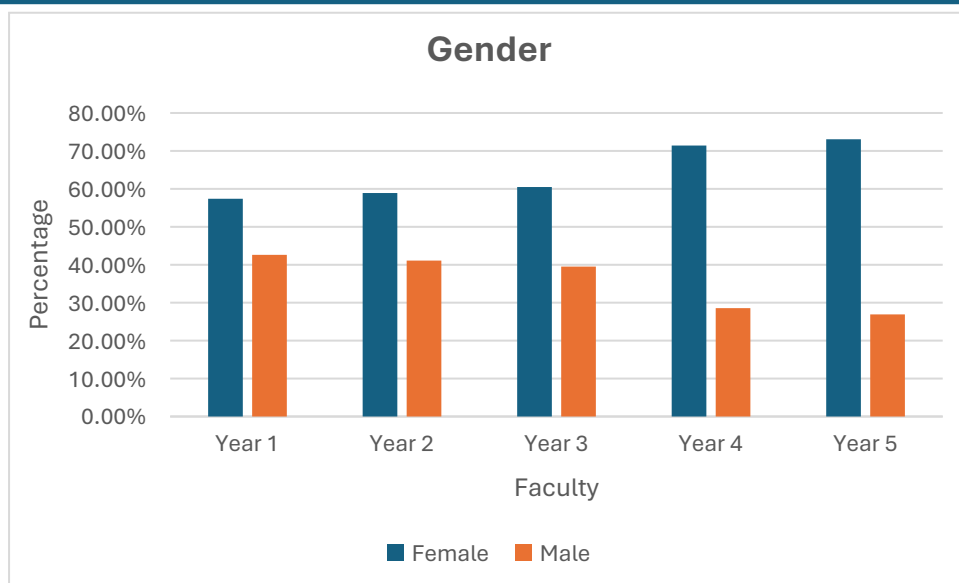

Figure 1

2. Age range:

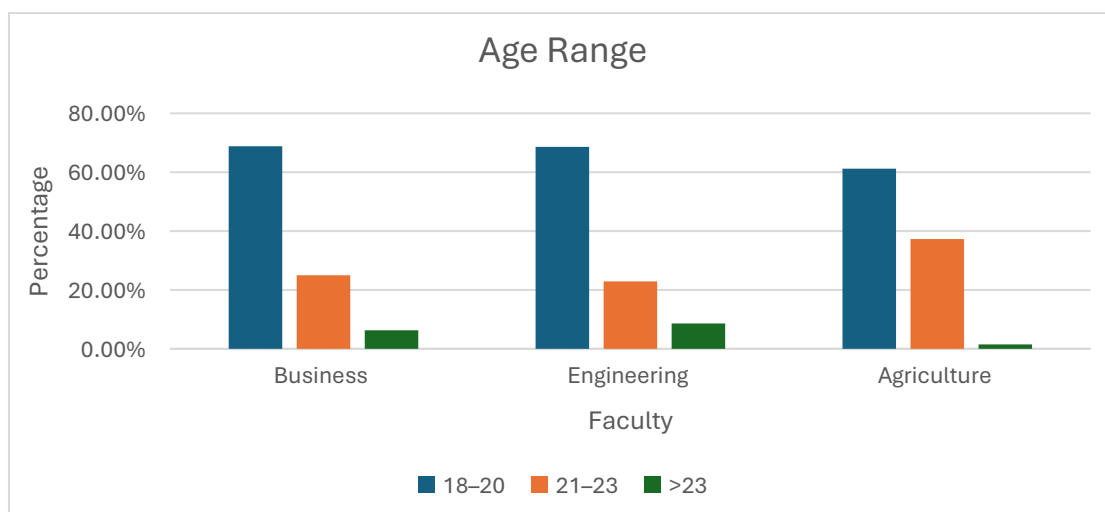

Figure 2

Comment:

Most students across all faculties fall within the 18–20 age range, with the highest in Business and Engineering. Organic Agriculture has a slightly older student profile, showing the highest percentage (37.3%) in the 21–23 age group. Students over 23 are a small minority in all faculties.

3. Marital status:

Faculty	Single	Engaged	Married
Business and Economics	100.00%	0.00%	0.00%
Engineering	88.60%	8.60%	2.90%
Organic Agriculture	96.30%	3.00%	0.70%

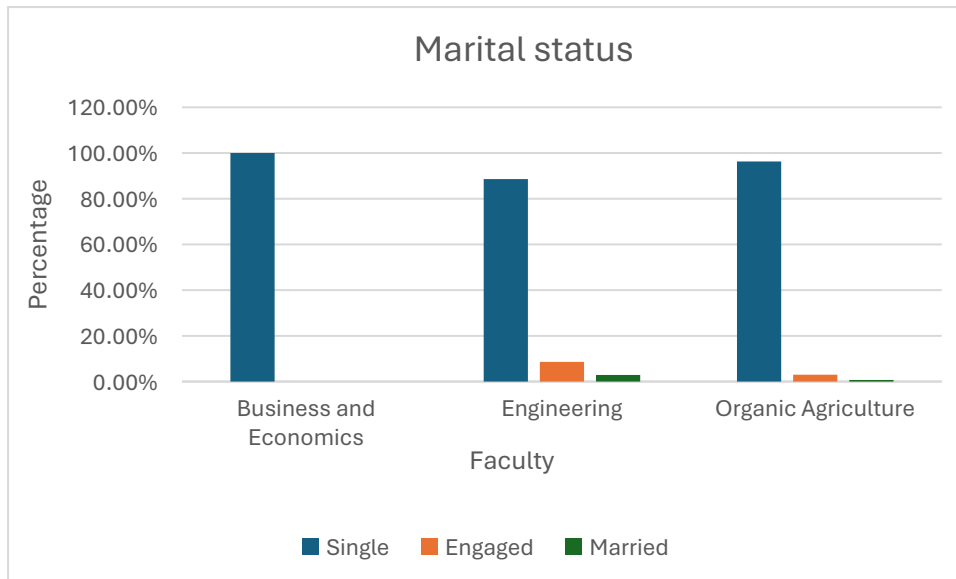

Figure 3

Comment:

Most students are single across all faculties. Business students are all single, while a small percentage of Engineering and Agriculture students are engaged or married.

4. Accommodation:

Faculty	With Parents	Student Housing	University Dorms	Rented Apartment
Business and Economics	96.90%	0.00%	0.00%	3.10%
Engineering	85.70%	5.70%	2.90%	5.70%
Organic Agriculture	87.30%	9.70%	1.50%	1.50%

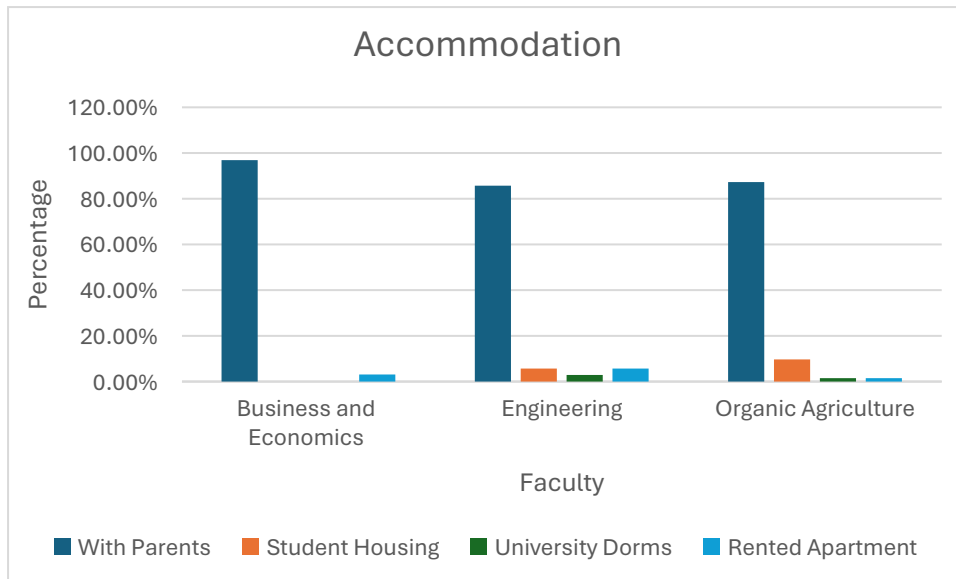

Figure 4

Comment:

Most students live with their parents. Student housing is slightly more common in Agriculture, while few use dorms or rented apartments.

5. Travel Duration:

Faculty	Less than 15 min	15–30 min	31–60 min	More than 1 hour
Business & Economics	0.50%	4.00%	4.50%	7.00%
Engineering	1.00%	6.00%	2.00%	8.50%
Organic Agriculture	6.50%	13.40%	18.90%	27.90%

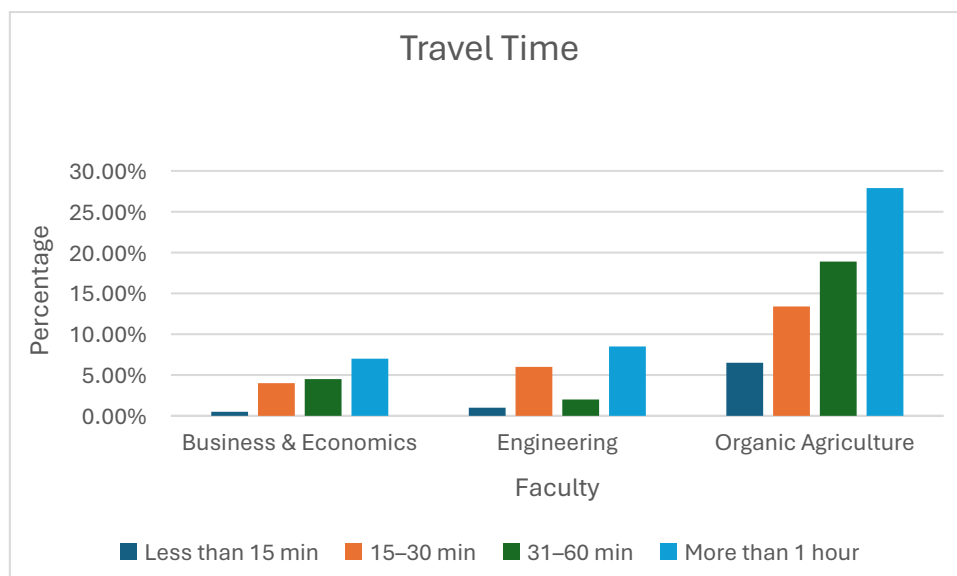

Figure 5

Comment:

Most students (43.3%) study for more than 1 hour, especially those in Organic Agriculture. Business and Economics students spend the least time studying overall.

II. Student's health & lifestyle information:

6. Body mass index (BMI):

N.B:

- under 18.5 – This is described as underweight.
- between 18.5 and 24.9 – This is described as the 'healthy range'.
- between 25 and 29.9 – This is described as overweight.
- between 30 and 39.9 – This is described as obesity.
- 40 or over – This is described as severe obesity.

Faculty	Underweight	Healthy Range	Overweight	Obese	Not Defined
Business and Economics	9.40%	50.00%	34.40%	6.30%	0.00%
Engineering	8.60%	45.70%	34.30%	11.40%	0.00%
Organic Agriculture	5.20%	56.00%	24.60%	11.20%	3.00%

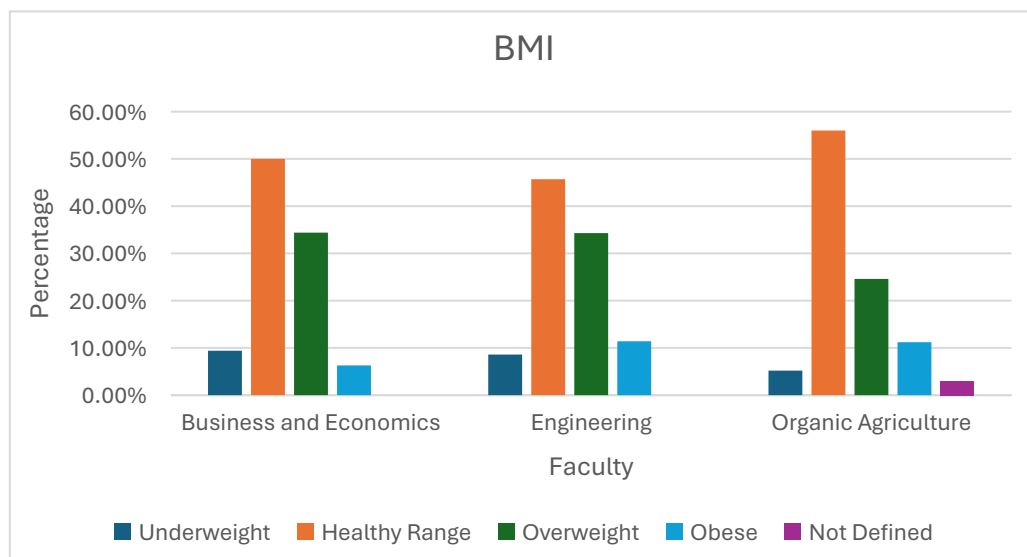

Figure 6

Comment:

Most students fall within the healthy BMI range, especially in Organic Agriculture (56%). Business and Economics shows the highest rate of overweight and obesity combined (40.7%), indicating a potential concern. Underweight cases are low across all faculties.

7. Do you suffer from illnesses?

Faculty	Yes	No
Business & Economics	37.50%	62.50%
Engineering	28.60%	71.40%
Organic Agriculture	41.00%	59.00%

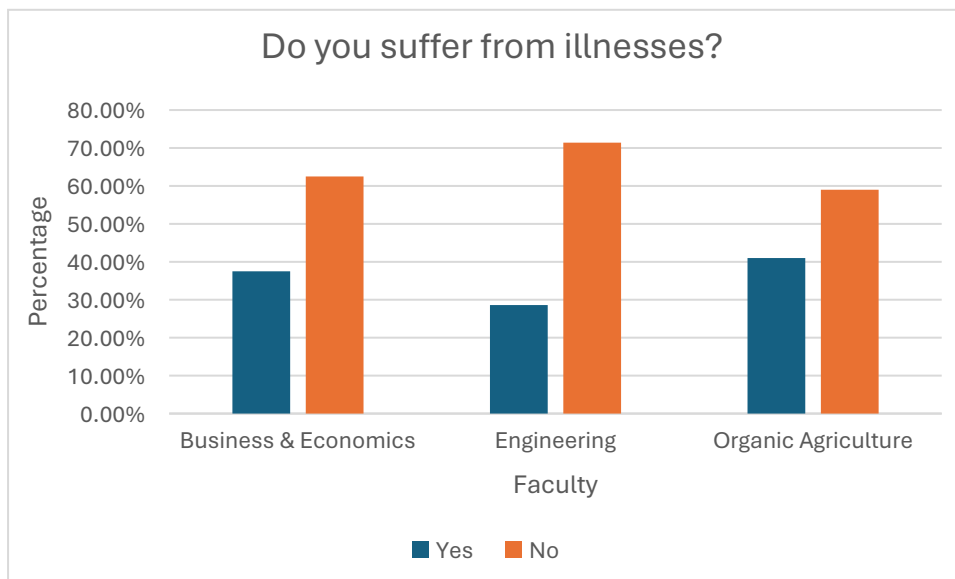

Figure 7

8. Do you have any of the following medical condition/s?

Do you have any of the following medical condition/s?

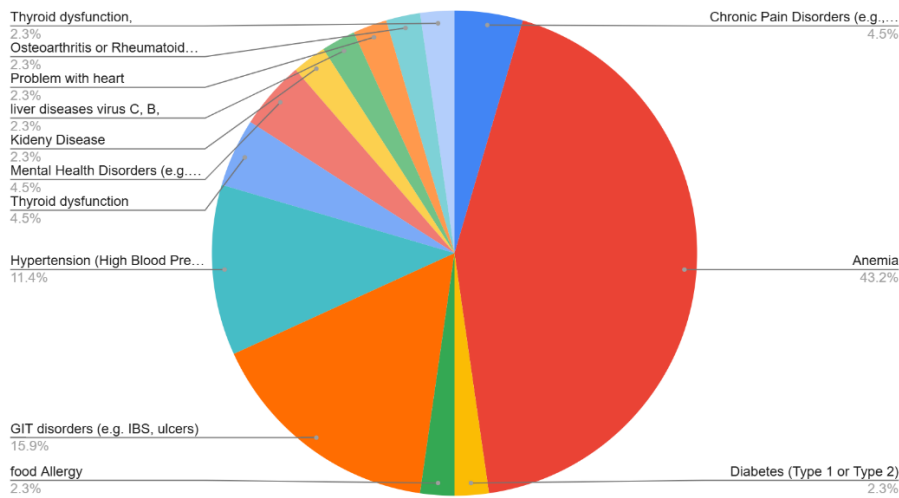

Figure 8a: Organic Agriculture

- **Anemia is the most prevalent condition**, accounting for **43.2%** of respondents. This indicates a significant public health concern, possibly linked to nutritional deficiencies or other systemic factors.
- **Gastrointestinal (GIT) disorders** (e.g., IBS, ulcers) are the second most common, representing **15.9%** of cases, followed by **hypertension** at **11.4%**, suggesting lifestyle and dietary factors may be contributing to these conditions.
- Conditions such as **chronic pain disorders** (4.5%) and **mental health disorders** (4.5%) also appear, reflecting the presence of chronic and psychosocial health issues.
- Several conditions, including **thyroid dysfunction, osteoarthritis/rheumatoid disorders, heart problems, liver disease, kidney disease, food allergies, and diabetes**, each account for **2.3%**, indicating relatively low but noteworthy prevalence.

Do you have any of the following medical condition/s?

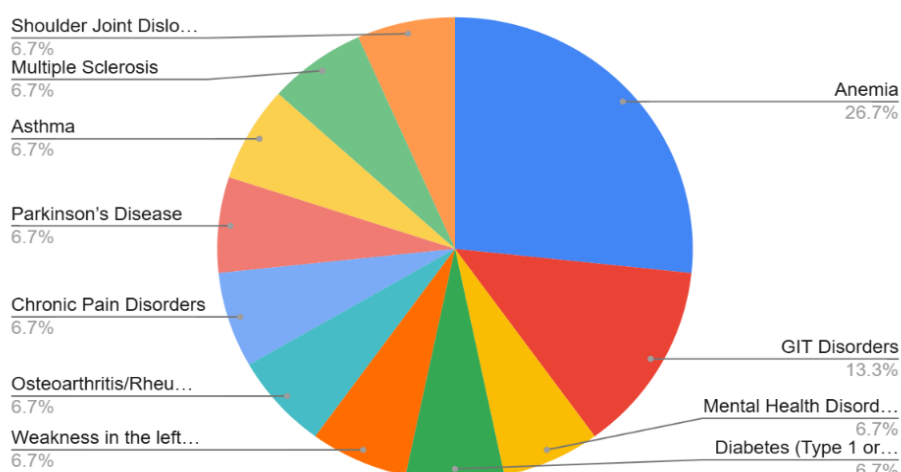

Figure 8b: Business and Economics

- **Anemia is the most common condition**, affecting **26.7%** of respondents, making it the primary health concern within the surveyed population.
- **Gastrointestinal (GIT) disorders** rank second with **13.3%**, indicating notable digestive health challenges.
- Multiple other conditions—**mental health disorders, diabetes (Type 1 or 2), osteoarthritis/rheumatologic issues, chronic pain disorders, Parkinson's disease, asthma, multiple sclerosis, shoulder joint dislocation, and weakness in the left side**—each account for **6.7%** of respondents.
- The diversity of conditions suggests a **wide range of chronic and systemic health issues** rather than dominance by a single secondary condition after anemia.

Do you have any of the following medical condition/s?

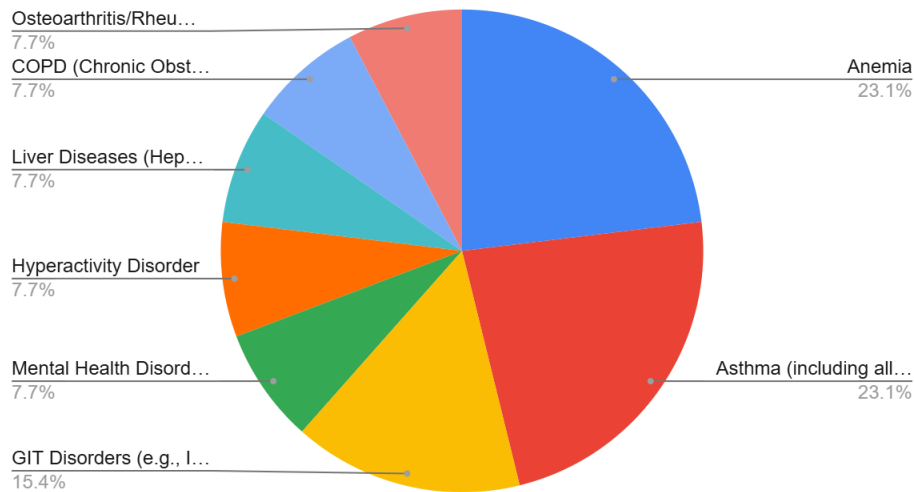

Figure 8c: Engineering

- **Anemia and Asthma are the most common conditions**, each representing **23.1%** of the sample. This indicates significant health concerns related to both respiratory and hematologic systems.
- **Gastrointestinal (GIT) disorders** rank third at **15.4%**, highlighting a considerable burden of digestive health issues.
- Other conditions—including **mental health disorders, hyperactivity disorder, liver diseases, COPD (Chronic Obstructive Pulmonary Disease), and osteoarthritis/rheumatologic disorders**—each account for **7.7%** of respondents.
- The distribution indicates **two dominant conditions (anemia and asthma)** and a fairly even spread among other chronic health problems.

9. Do you have a history of cancer?

Faculty	Yes	No
Business & Economics	3.10%	96.90%
Engineering	0.00%	100.00%
Organic Agriculture	0.00%	100.00%

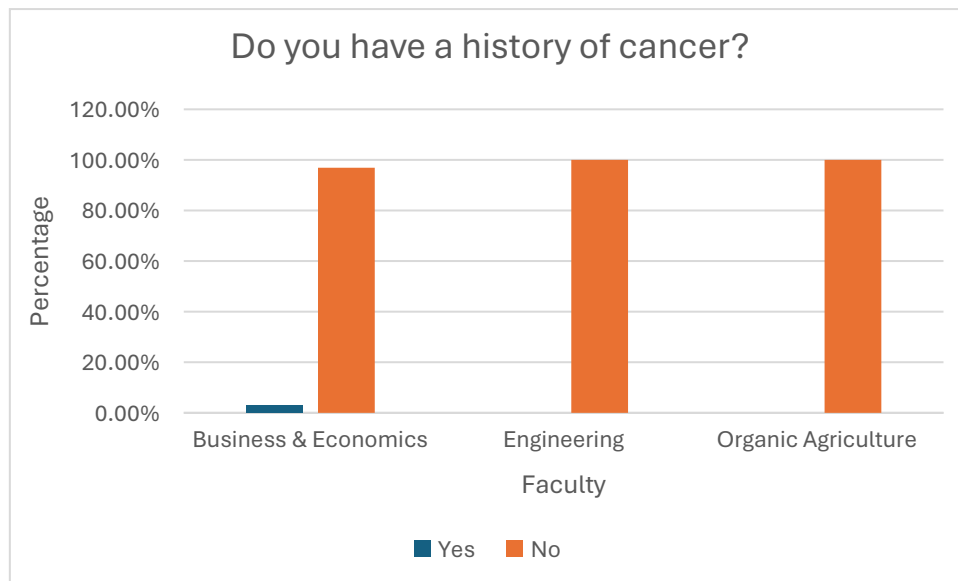

Figure 9

Comment:

A history of cancer was reported by only one participant (3.1%) from the Business & Economics faculty, while no cases were reported in the Engineering or Organic Agriculture faculties. This indicates a very low prevalence of cancer history among the study sample.

10. Have you undergone any previous surgeries?

Surgery Type	Business & Economics	Engineering	Organic Agriculture
Laparoscopic Surgery	0.00%	0.00%	16.70%
Appendectomy	22.20%	0.00%	16.70%
Plastic/Reconstructive Surg.	0.00%	0.00%	11.10%
Eye Surgery	44.40%	50.00%	27.80%
Knee Surgery	0.00%	0.00%	11.10%
Heart Surgery	0.00%	0.00%	5.60%
Gallbladder Removal	11.10%	0.00%	5.60%
Back Surgery	11.10%	0.00%	5.60%
Tumor Removal	11.10%	0.00%	0.00%
Bariatric Surgery	0.00%	50.00%	0.00%

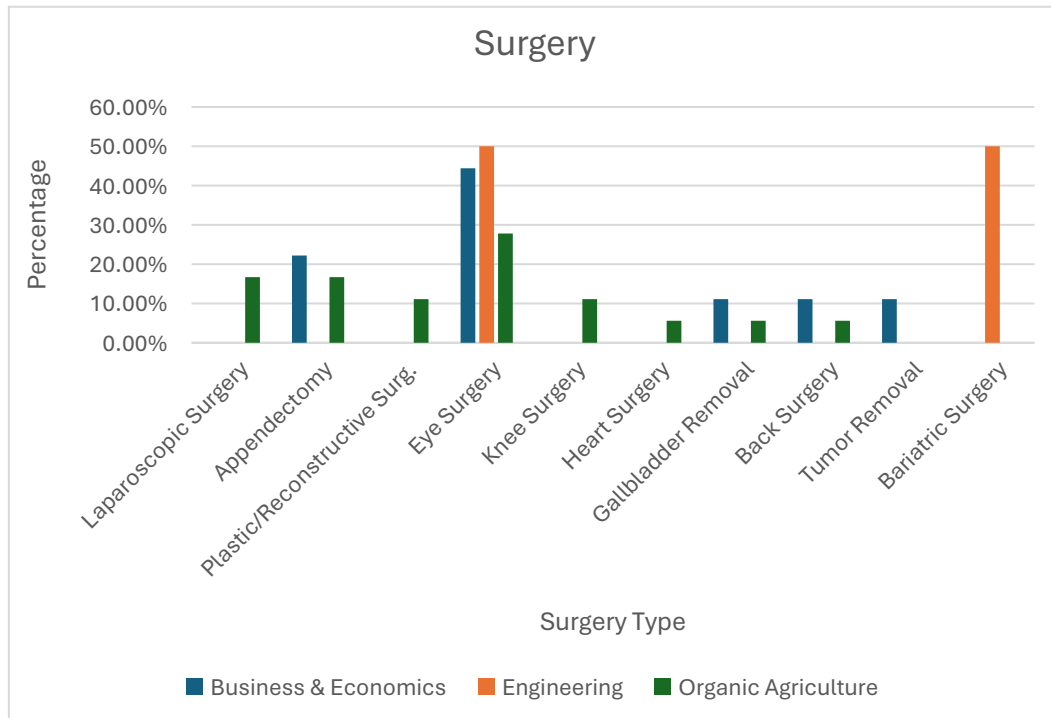

Figure 10

Comment:

Eye surgery was the most common across all faculties, particularly in Engineering (50%) and Business & Economics (44.4%). Organic Agriculture had the highest overall surgical history, with a wider distribution of different surgeries. Bariatric and tumor removal surgeries were reported only in one faculty each.

11. Are there doctors or therapists who treat you?

Category	Business & Economics	Engineering	Organic Agriculture
1 Doctor	68.40%	82.40%	73.20%
2 Doctors	10.50%	17.60%	12.50%
3+ Doctors	21.10%	0.00%	14.30%

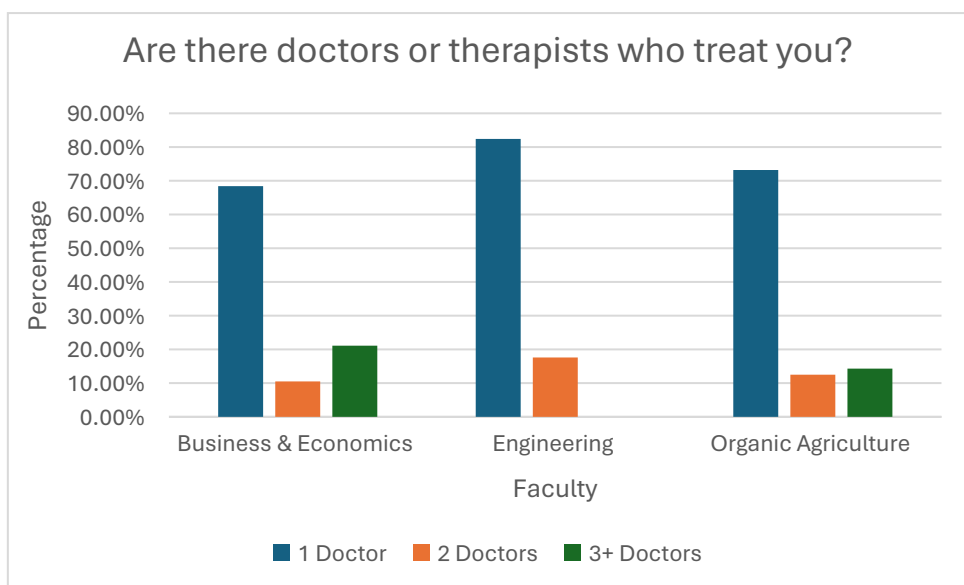

Figure 11

Comment:

Most participants saw only one doctor, especially in Engineering. Few visited two doctors, and even fewer saw three or more, with no Engineering participants in that group.

12. Please list all the medications you are currently taking for chronic health conditions:

Category	Business & Economics	Engineering	Organic Agriculture
1- Medication	50.00%	50.00%	82.90%
2- Medication	37.50%	50.00%	5.70%
3+ Medication	12.50%	0.00%	11.40%

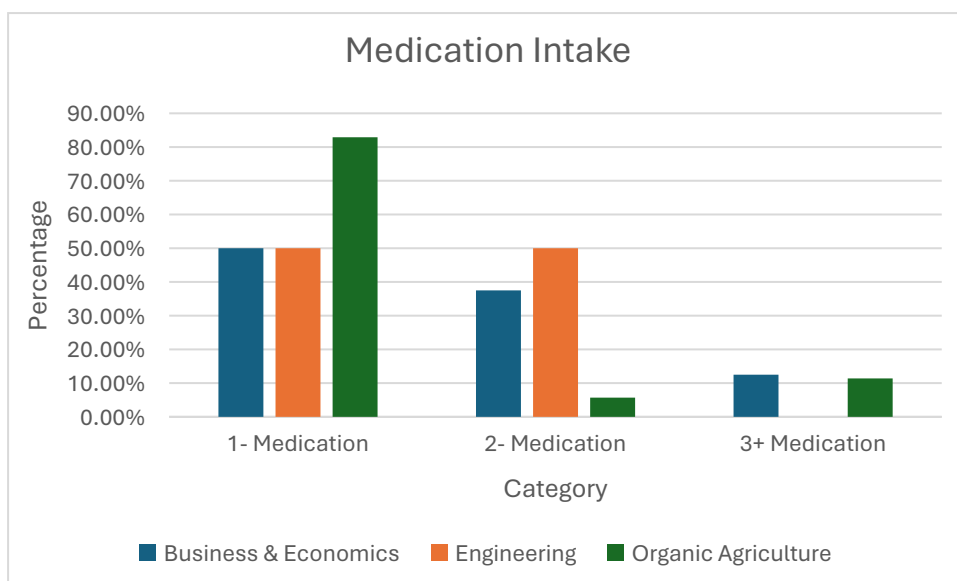

Figure 12

Comment:

Most students across all fields take only one medication, especially in Organic Agriculture (82.9%). Engineering students are split evenly between one and two medications, while Business & Economics students show the highest percentage (12.5%) taking three or more medications.

13. How many hours do you typically sleep each night?

Sleep Duration	Business & Economics	Engineering	Organic Agriculture
Less than 5 hours	18.80%	20.00%	13.40%
5 to 7 hours	50.00%	62.90%	57.50%
8 to 9 hours	31.30%	17.10%	29.10%

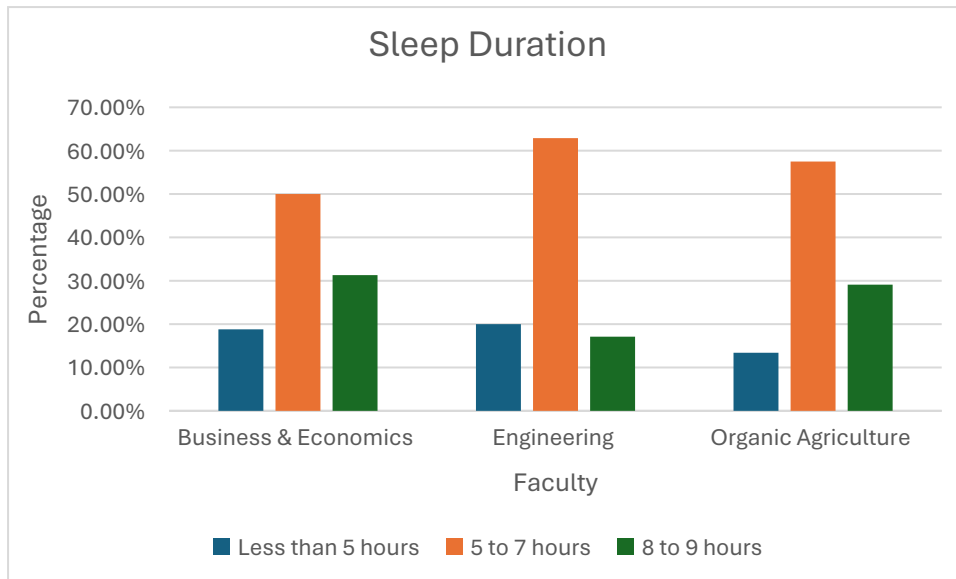

Figure 13

Comment:

Most students across all faculties sleep 5 to 7 hours, especially in Engineering (62.9%). Organic Agriculture students have the healthiest sleep pattern, with the lowest percentage sleeping less than 5 hours (13.4%). Business & Economics students show a more balanced sleep distribution.

14. How many cigarettes do you smoke on an average day?

Smoking Status	Business & Economics	Engineering	Organic Agriculture
I do not smoke	87.50%	91.40%	89.60%
6–10 cigarettes/day	6.30%	5.70%	3.00%
11–20 cigarettes/day	6.30%	2.90%	4.50%
More than 20/day	0.00%	0.00%	3.00%

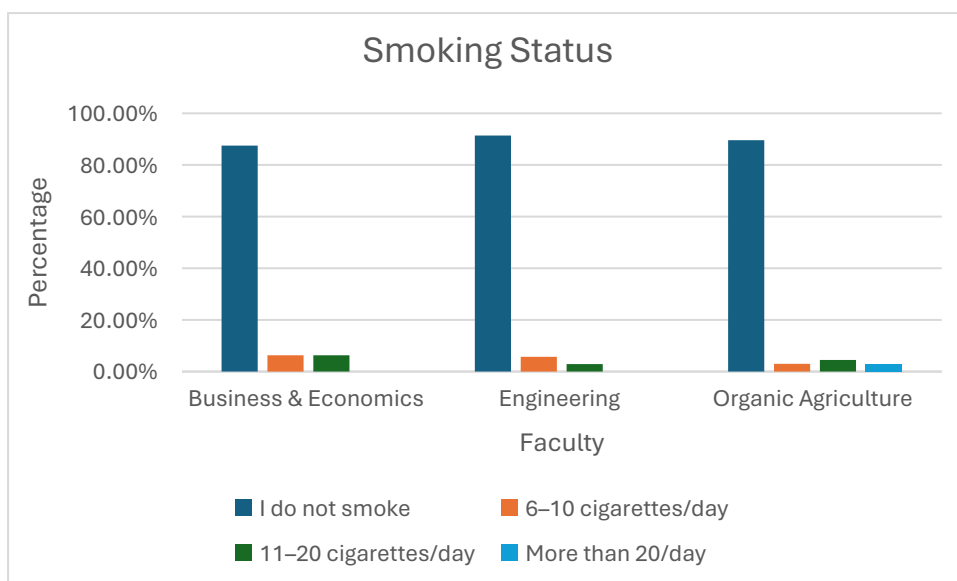

Figure 14

Comment:

Most students do not smoke, with the highest rate in Engineering. Heavy smoking is rare across all faculties.

III. Dietary and lifestyle Habits

15. How often do you buy organic foods?

Status	Business & Economics	Engineering	Organic Agriculture
Daily	18.80%	17.10%	3.70%
Several times a week	37.50%	37.10%	24.60%
Once a week	12.50%	22.90%	13.40%
Rarely or never	31.30%	22.90%	58.20%

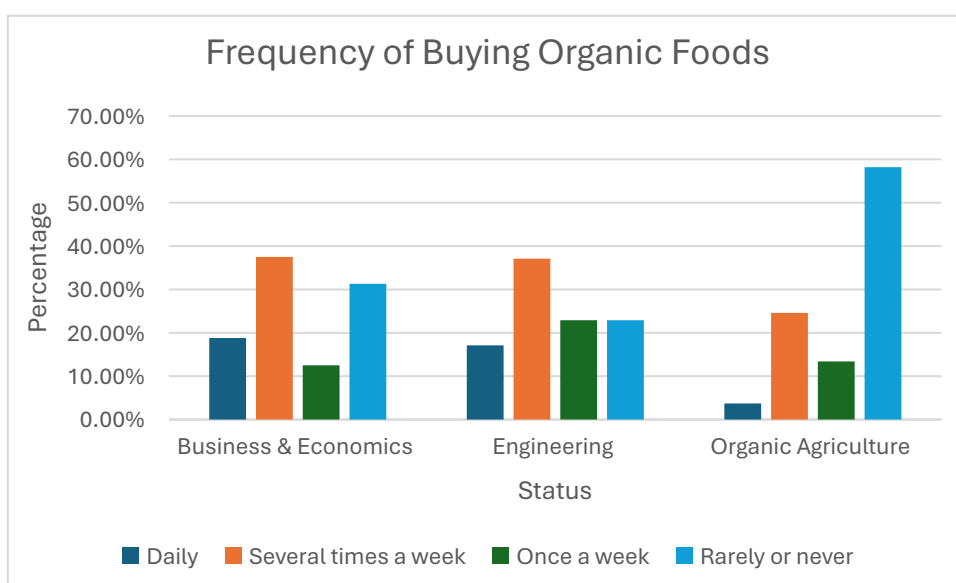

Figure 15

Comment:

Most students in Business & Economics and Engineering buy organic foods regularly, with over 50% doing so at least several times a week. In contrast, most Organic Agriculture students (58.2%) rarely or never buy organic foods, which is unexpectedly high given their field.

16. How often do you eat vegetables per week?

Frequency	Business & Economics	Engineering	Organic Agriculture
Daily	43.75%	42.86%	43.28%
Several times a week	43.75%	40.00%	39.55%
Once a week	9.38%	11.43%	8.96%
Rarely or never	3.13%	5.71%	8.21%

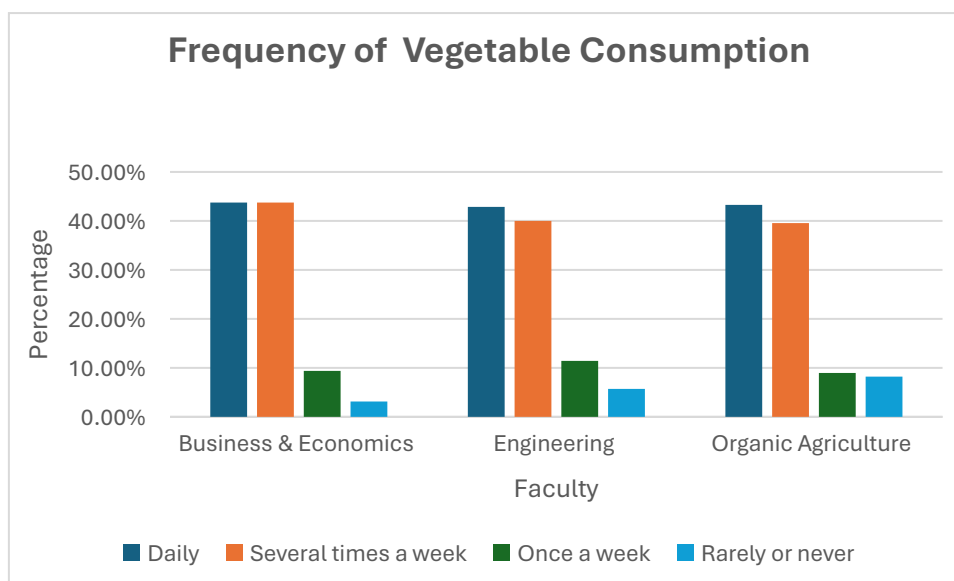

Figure 16

Comment:

Most students from all faculties eat vegetables regularly, though a small group still has low weekly intake.

17. How often do you eat fruits per week?

Frequency	Business & Economics	Engineering	Organic Agriculture
Daily	25.00%	40.00%	23.88%
Several times a week	59.38%	40.00%	51.49%
Once a week	15.63%	11.43%	16.42%
Rarely or never	0.00%	8.57%	8.21%

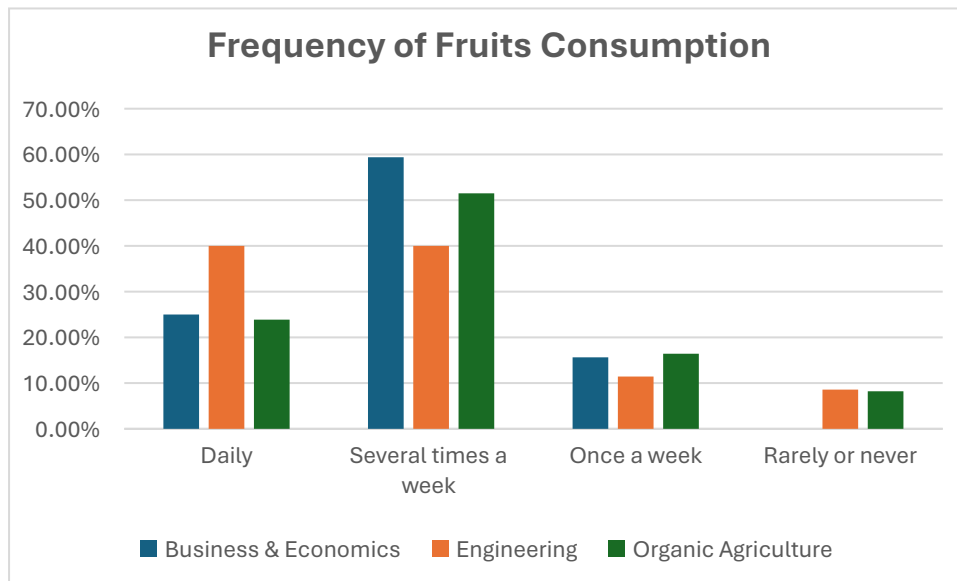

Figure 17

Comment:

Most students eat fruit several times a week. Daily intake is highest in Engineering. Few students, mainly in Organic Agriculture, rarely eat fruit.

18. How often do you eat red meat per week?

Frequency	Business & Economics	Engineering	Organic Agriculture
Daily	9.38%	5.71%	3.73%
Several times a week	59.38%	57.14%	44.78%
Once a week	28.13%	22.86%	38.06%
Rarely or never	3.13%	14.29%	13.43%

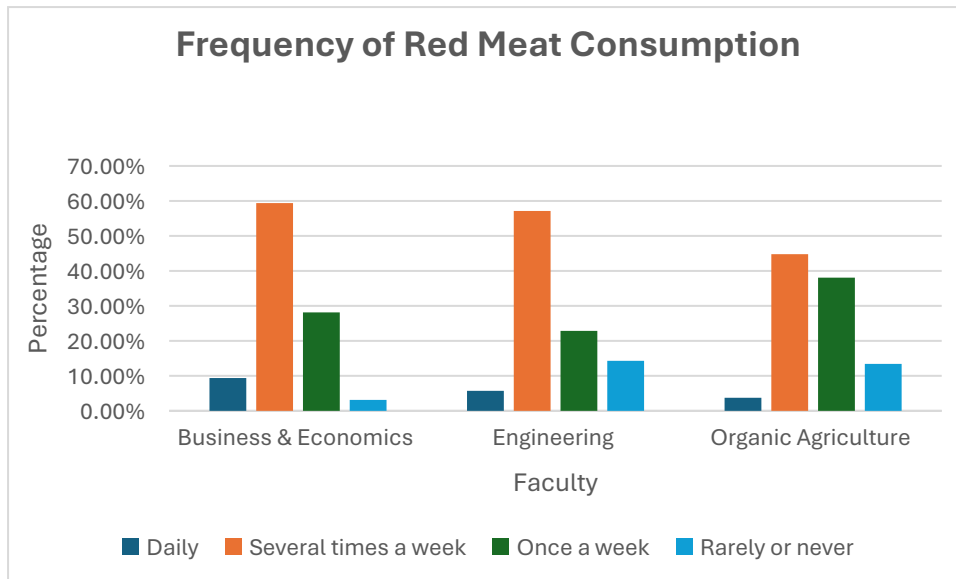

Figure 18

Comment:

Most students eat red meat several times a week. Daily consumption is low, while a notable portion, especially in some faculties, eat it only once a week or rarely.

19. How often do you eat poultry per week?

Frequency	Business & Economics	Engineering	Organic Agriculture
Daily	3.13%	8.57%	14.18%
Several times a week	68.75%	71.43%	58.96%
Once a week	15.63%	14.29%	23.13%
Rarely or never	12.50%	5.71%	3.73%

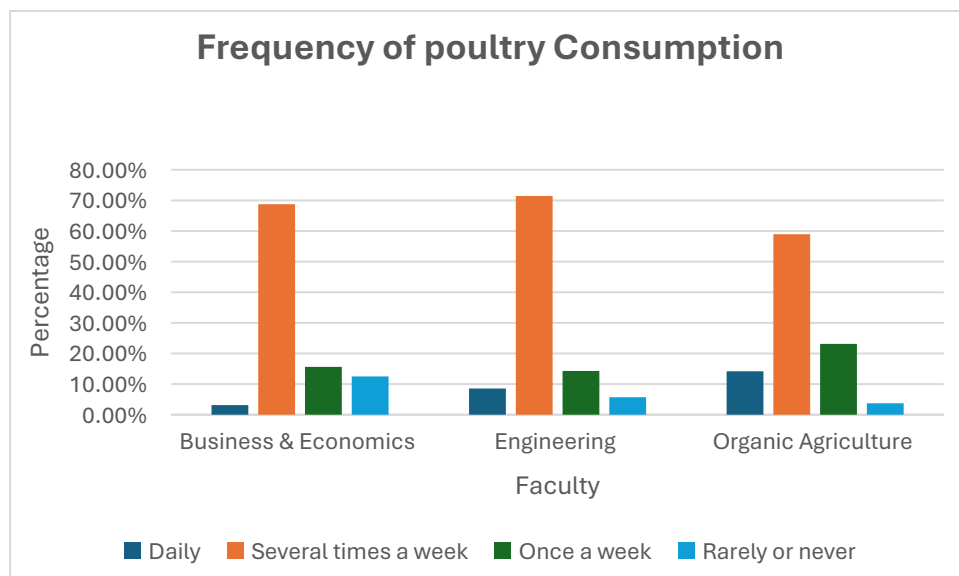

Figure 19

Comment:

Most students consume poultry several times a week, especially in Engineering and Business & Economics. Daily intake is highest in Organic Agriculture, while rarely or never eating poultry is least common overall.

20. How often do you eat fish per week?

Frequency	Business & Economics	Engineering	Organic Agriculture
Daily	3.13%	0.00%	1.49%
Several times a week	31.25%	11.43%	15.67%
Once a week	40.63%	37.14%	48.51%
Rarely or never	25.00%	51.43%	34.33%

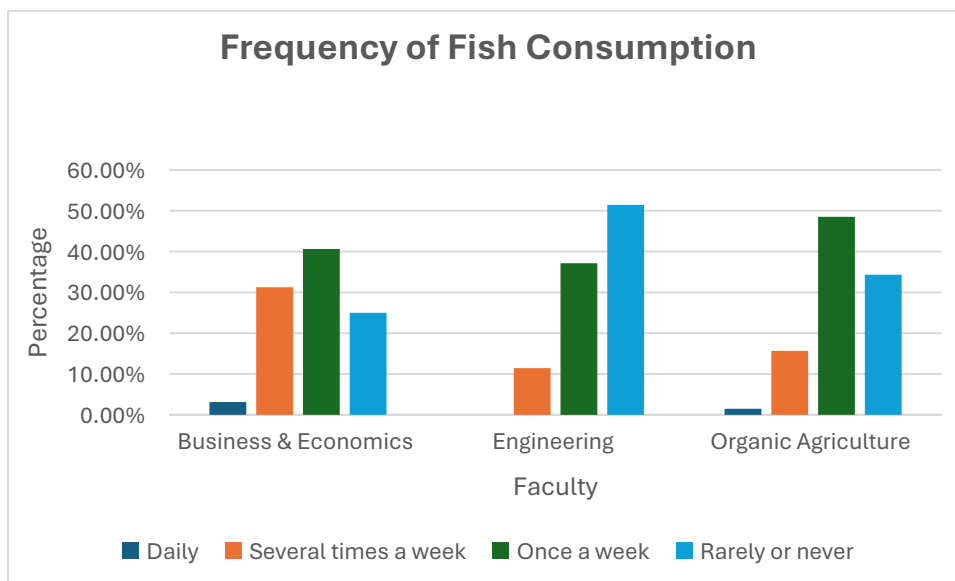

Figure 20

Comment:

Fish is mostly consumed once a week or rarely, with low daily intake across all faculties.

21. How often do you eat processed/canned meat/fish per week?

Frequency	Business & Economics	Engineering	Organic Agriculture
Daily	0.00%	2.86%	3.73%
Several times a week	21.88%	11.43%	17.91%
Once a week	31.25%	22.86%	23.88%
Rarely or never	46.88%	62.86%	54.48%

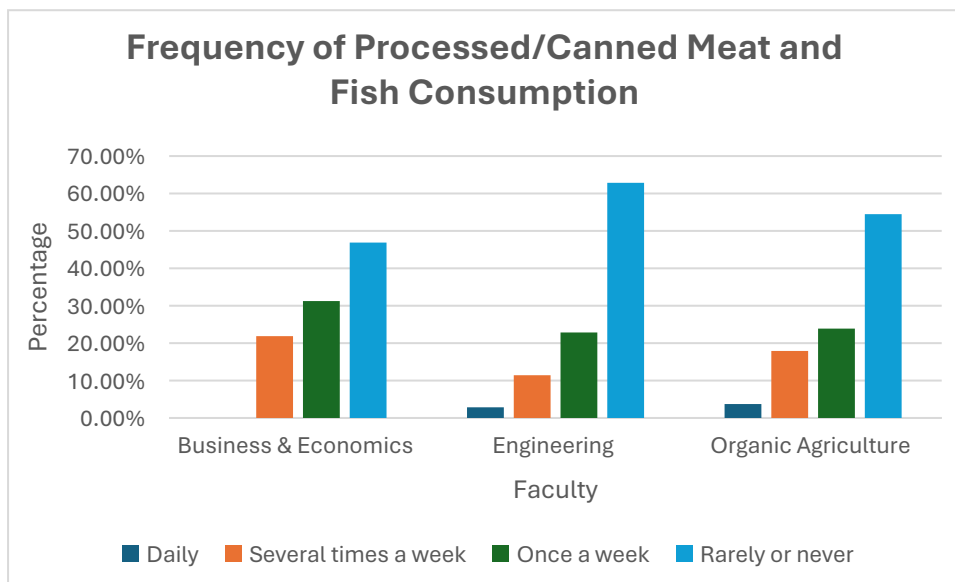

Figure 21

Comment:

Most students consume processed or canned meat/fish rarely or never. Weekly or daily consumption is low across all faculties.

22. How often do you eat high-fat or fried foods?

Frequency	Business & Economics	Engineering	Organic Agriculture
Daily	3.13%	14.29%	15.67%
Several times/week	50.00%	40.00%	50.00%
Once a week	40.63%	28.57%	21.64%
Rarely or never	6.25%	17.14%	12.69%

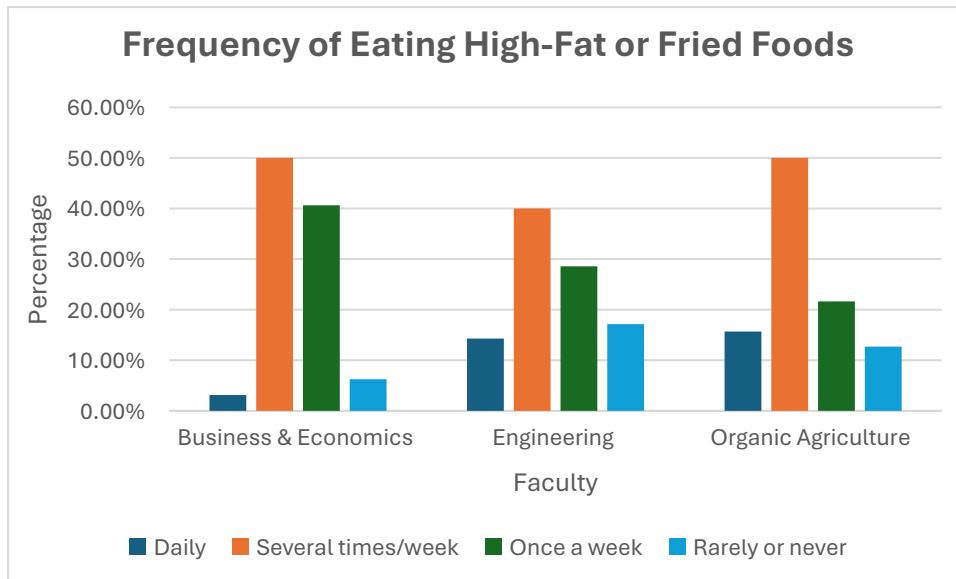

Figure 22

Comment:

Most students eat high-fat or fried foods several times a week, with Organic Agriculture showing the highest frequent intake. Engineering students consume them less often.

23. How often do you eat foods high in sugar/desserts?

Frequency	Business & Economics	Engineering	Organic Agriculture
Daily	6.25%	31.43%	21.64%
Several times/week	40.63%	20.00%	37.31%
Once a week	40.63%	25.71%	28.36%
Rarely or never	12.50%	22.86%	12.69%

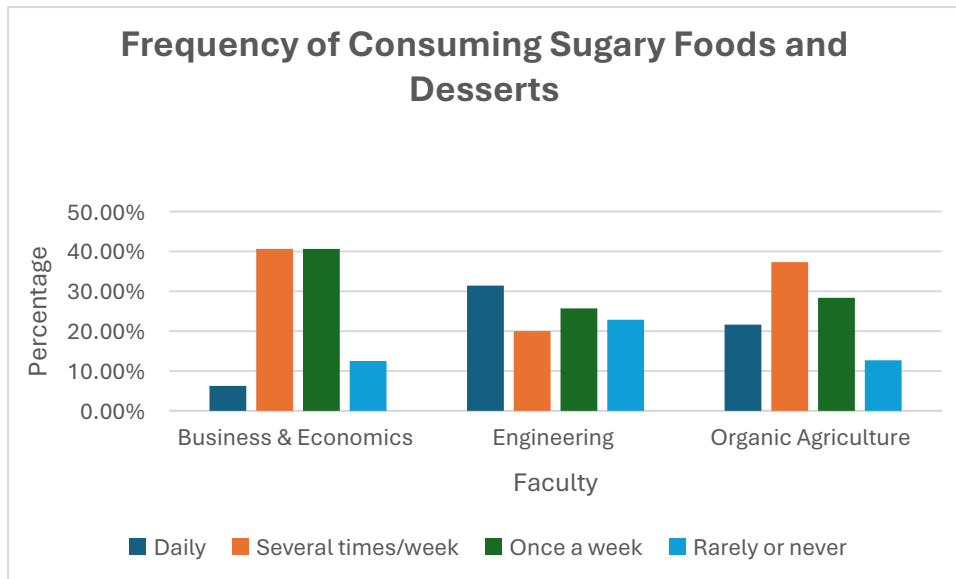

Figure 23

Comment:

Most students eat sugary foods at least weekly. Organic Agriculture students have the highest frequent intake, while Engineering and Business students show more balanced patterns.

24. How often do you eat Baladi bread?

Frequency	Business & Economics	Engineering	Organic Agriculture
Daily	50.00%	45.71%	58.96%
Several times/week	21.88%	25.71%	26.12%
Once a week	15.63%	2.86%	5.22%
Rarely or never	12.50%	25.71%	9.70%

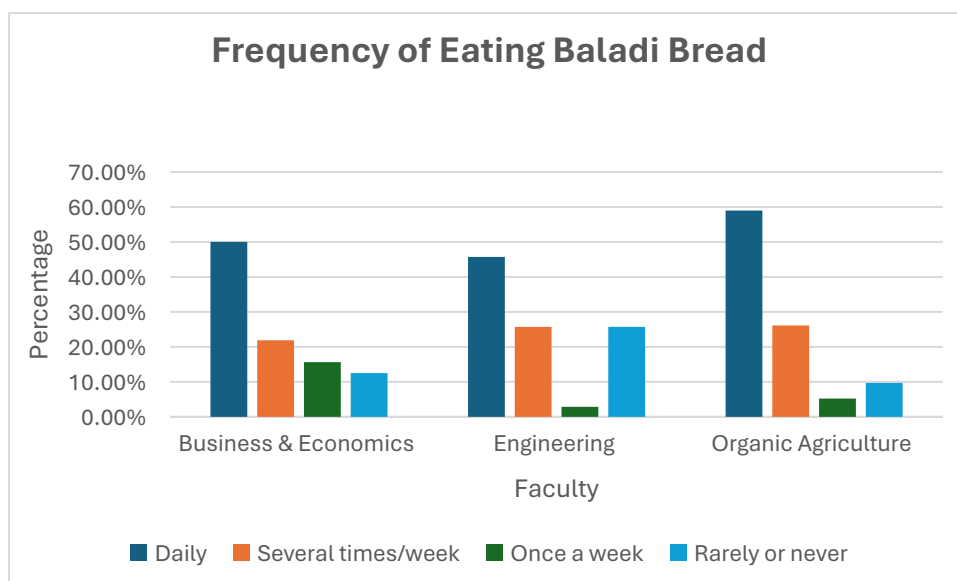

Figure 24

Comment:

Most students consume Baladi bread regularly, with the majority eating it daily or several times a week across all faculties.

25. What type of fat do you always use in cooking?

Type of Fat/Oil	Business & Economics	Engineering	Organic Agriculture
Corn oil	9.38%	5.71%	14.93%
Natural butter	18.75%	17.14%	29.10%
Olive oil	31.25%	25.71%	12.69%
Margarine	12.50%	11.43%	8.96%
Cotton seed oil	3.13%	2.86%	
Sunflower oil	21.88%	37.14%	32.84%
Mixed types	3.13%		1.49%
Not specified	–	2.86%	

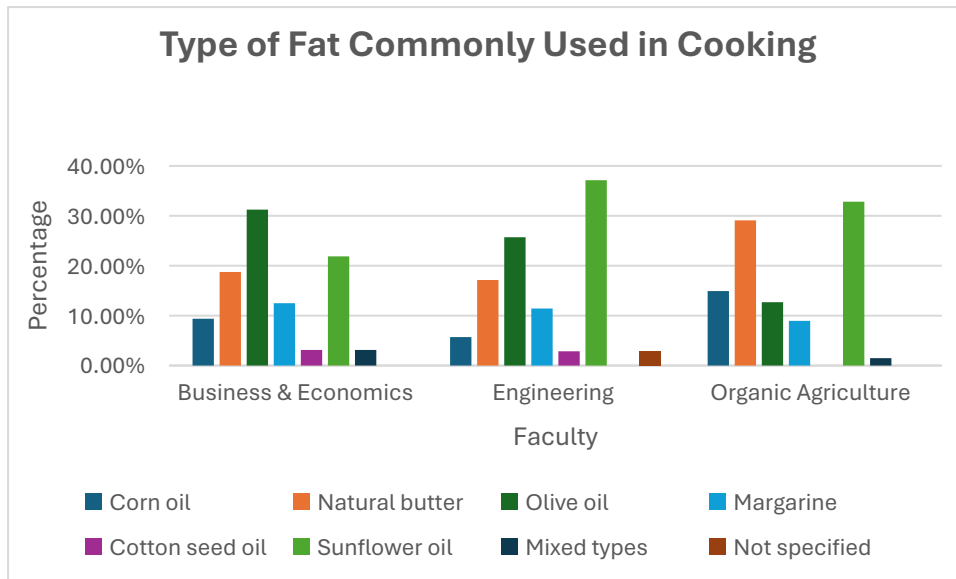

Figure 25

Comment:

Most students prefer using vegetable oils like sunflower or olive oil in cooking. Use of animal fats or margarine is less common. This reflects a general trend toward lighter, plant-based cooking fats.

26. At what level do you estimate your daily physical activity?

Physical Activity Level	Business & Economics	Engineering	Organic Agriculture
Low	18.75%	28.57%	31.34%
Moderate	59.38%	48.57%	60.45%
High	21.88%	22.86%	8.21%

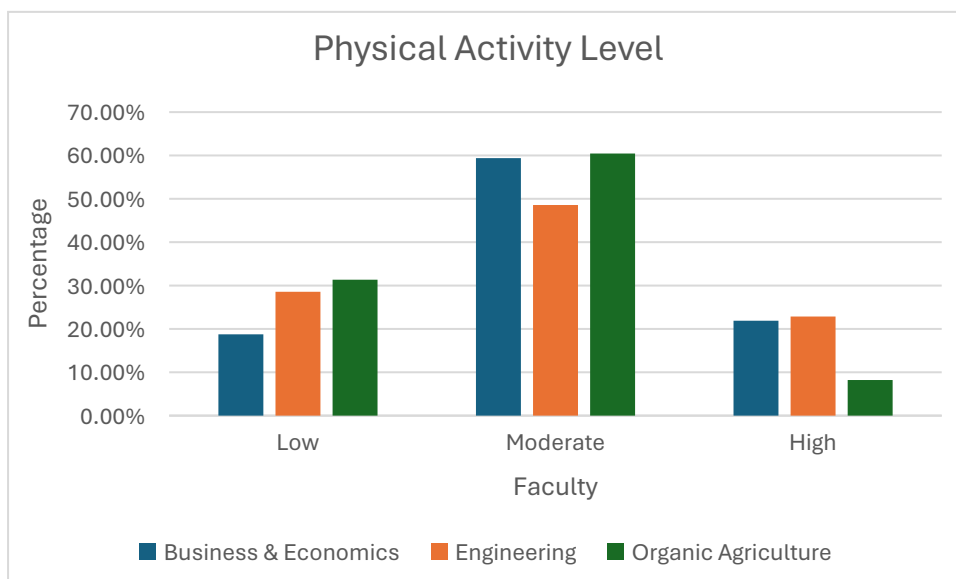

Figure 26

Comment:

Most students show moderate activity, especially in Organic Agriculture. Low activity is highest in Organic Agriculture, while high activity is most common in Business & Economics.

27. Do you have a regular fitness routine?

Activity	Business & Economics	Engineering	Organic Agriculture
None	21.88%	31.43%	38.06%
Walking	37.50%	31.43%	40.30%
Gym exercises	21.88%	11.43%	11.94%
Sport	18.75%	22.86%	8.96%
Unspecified	0%	2.86%	0.75%

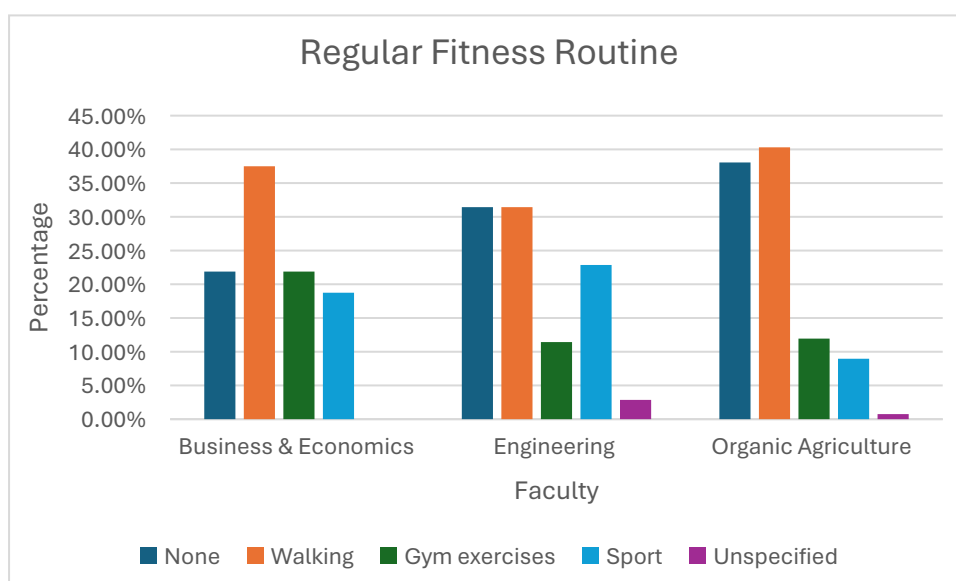

Figure 27

Comment:

Most students do not follow a regular fitness routine, indicating a need to promote consistent physical activity across all faculties.

IV. Women's health, Are your periods regular?

Period Regularity	Business & Economics	Engineering	Organic Agriculture
Yes	64.71%	88.89%	76.19%
No	17.65%	0.00%	21.43%
Not specified	23.53%	11.11%	2.38%

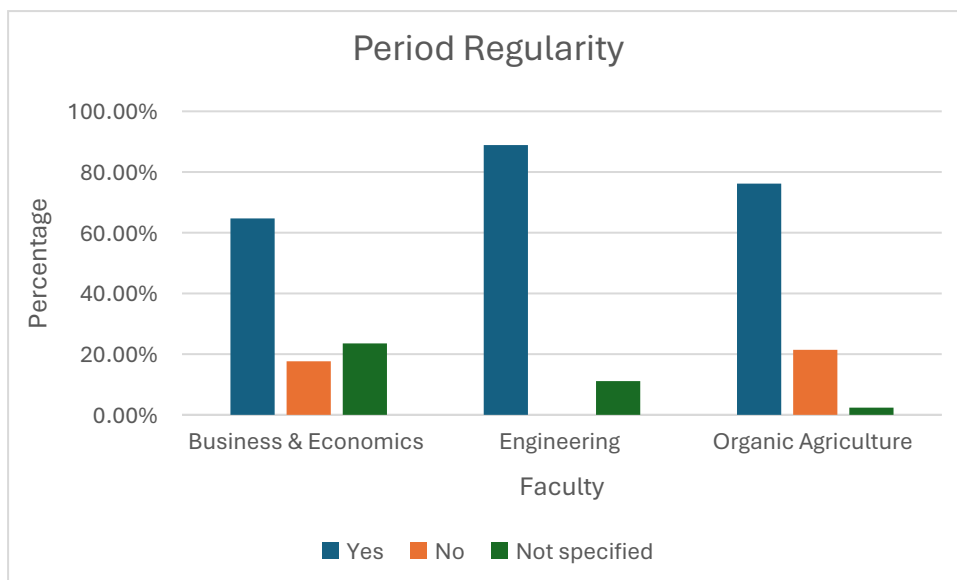

Figure 28

Comment:

Most students report regular periods, especially in Engineering. Business & Economics had the highest rate of unspecified answers.

V. Student's self-evaluation information:

Question	Faculty	Agree (%)	Disagree (%)
Q1: I feel happy with my life	Business & Economics	81.30%	18.70%
	Engineering	77.10%	22.90%
	Organic Agriculture	79.90%	20.10%
Q2: I feel calm and relaxed	Business & Economics	59.40%	40.60%
	Engineering	80.00%	20.00%
	Organic Agriculture	52.20%	47.80%
Q3: I feel supported and connected to my family and community	Business & Economics	84.40%	15.60%
	Engineering	80.00%	20.00%
	Organic Agriculture	79.90%	20.10%
Q4: I feel financially stable and secure	Business & Economics	78.10%	21.90%
	Engineering	80.00%	20.00%
	Organic Agriculture	78.40%	21.60%
Q5: I have a purpose in life that I am working to achieve	Business & Economics	90.63%	9.38%
	Engineering	82.86%	17.14%
	Organic Agriculture	88.81%	11.19%
Q6: I have confidence in my opinions	Business & Economics	81.25%	18.75%
	Engineering	82.86%	17.14%
	Organic Agriculture	88.81%	11.19%
Q7: Life has been a continuous process of learning, changing, and growth	Business & Economics	93.75%	6.25%
	Engineering	85.71%	14.29%
	Organic Agriculture	79.85%	20.15%

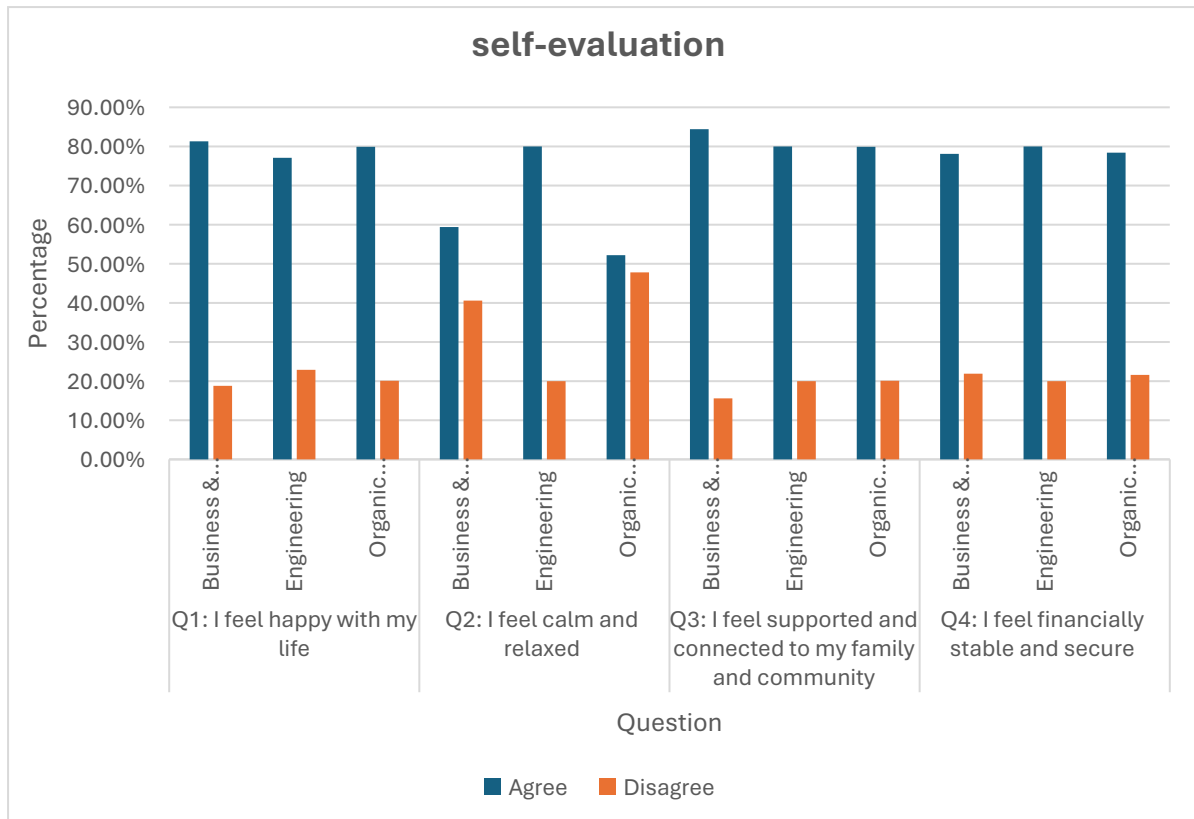

Figure 29/a

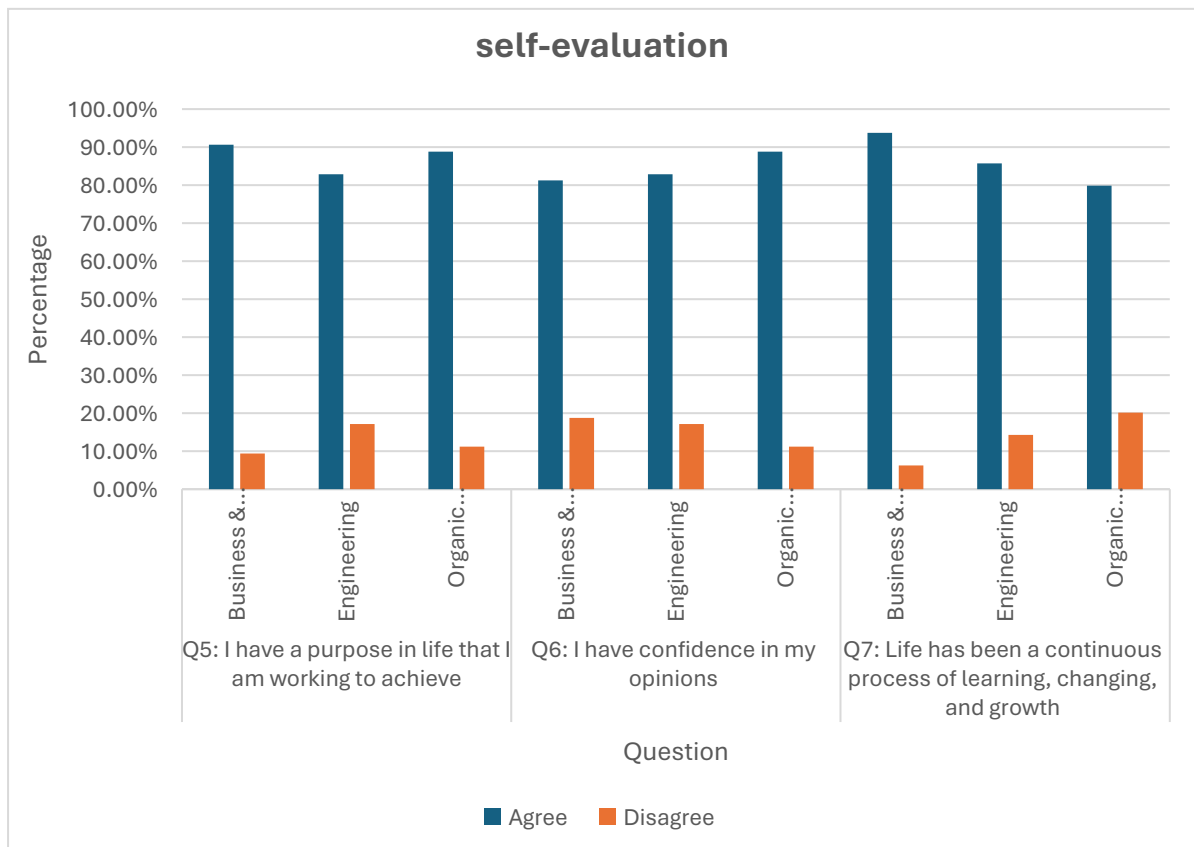

Figure 29/B
