

SCREENING INTEGRATIVE HEALTH REPORT FOR **PHARMACY STUDENTS**

Integrative Health Center
2024 - 2025

Purpose:

Most university students belong to young adulthood with age ranges between 18 – 26 years old. Many reports identified this phase as biologically, and psychologically stage that influences university students' attitude and decision-making. According to previous reports, there is a high prevalence of risky behaviours among college students, such as eating disorders, anxiety, and depression, as well as tobacco/ vaping products usage. Accordingly, our aim is to implement holistic health screening for students at Heliopolis University for Sustainable Development regardless their faculty or study level. A self-completion questionnaire was administered through Computer-Assisted Group Interviewing about health, lifestyle and dietary habits as well as self-evaluation.

Findings:**Total number of Students screened at different levels:**

Year	Number of Students
Year 1	351
Year 2	73
Year 3	81
Year 4	14
Year 5	104

Comment:

The data indicates a significantly higher number of students in **Year 1 (352)**, followed by a sharp decline in subsequent years, reaching the lowest point in **Year 4 (14)**.

I. Demographic information:**1. Gender:**

Year	Female	Male	Total
Year 1	57.39%	42.61%	351
Year 2	58.90%	41.10%	73
Year 3	60.49%	39.51%	81
Year 4	71.43%	28.57%	14
Year 5	73.08%	26.92%	104

Figure 1

Comment:

The data shows a consistent increase in the percentage of female students from Year 1 to Year 5, indicating stronger female enrolment in pharmacy programs.

2. Age range:

Year	Age 17–20	Age 21–23	Age >23
Year 1	98.29%	1.42%	0.28%
Year 2	91.78%	8.22%	0.00%
Year 3	51.85%	46.91%	1.23%
Year 4	7.14%	92.86%	0.00%
Year 5	0.00%	90.38%	9.62%

Figure 2

Comment:

The data shows a clear age progression across academic years, with most Year 1 students aged 17–20, and older age groups (21–23 and >23) becoming more prominent in later years, especially Years 4 and 5.

40

3. Marital status:

Year	Single	Engaged	Married	Widowed	Divorced
Year 1	99.72%	0.28%	0.00%	0.00%	0.00%
Year 2	97.26%	2.74%	0.00%	0.00%	0.00%
Year 3	93.83%	4.94%	1.23%	0.00%	0.00%
Year 4	85.71%	7.14%	7.14%	0.00%	0.00%
Year 5	81.73%	15.38%	2.88%	0.00%	0.00%

Figure 3

Comment:

The data shows that most pharmacy students across all academic years are single, with a gradual decrease in single status and a slight rise in engaged or married status in higher years. This trend likely reflects increased age, maturity, and life planning by the time students reach later academic stages, especially Year 5. The near absence of widowed or divorced statuses aligns with the relatively young age of the student population.

4. Accommodation:

Year	With Parents	Student Housing	University Dorms	Rented Private Apartment
2	71.23%	23.29%	0.00%	5.48%
3	61.73%	23.46%	2.47%	12.35%
4	71.43%	14.29%	0.00%	14.29%
5	75.24%	13.33%	1.90%	9.52%

Figure 4

5. Travel Duration:

Year	<15 min	15–30 min	31–60 min	>1 hour
2	10.96%	32.88%	26.03%	30.14%
3	25.93%	14.81%	17.28%	41.98%
4	0.00%	14.29%	42.86%	42.86%
5	16.35%	18.27%	21.15%	44.23%

Figure 5

Comment:

Most students in Years 3 and 5 spend over an hour commuting, while Years 2 and 4 have more varied travel times. Overall, longer travel durations increase in later years.

II. Student's health & lifestyle information:

6. Body mass index (BMI):

N.B:

- under 18.5 – This is described as underweight.
- between 18.5 and 24.9 – This is described as the 'healthy range'.
- between 25 and 29.9 – This is described as overweight.
- between 30 and 39.9 – This is described as obesity.
- 40 or over – This is described as severe obesity.

Year	Underweight	Healthy Range	Overweight	Obese
Year 1	8.50%	70.70%	19.40%	1.40%
Year 2	4.10%	63.00%	20.50%	12.30%
Year 3	4.90%	60.50%	28.40%	6.20%
Year 4	21.40%	42.90%	28.60%	7.10%
Year 5	7.70%	48.10%	30.80%	13.50%

Figure 6

Comment:

The data shows a decline in healthy BMI levels over the years, with a noticeable rise in overweight and obesity rates. This suggests increasing health risks among students as they advance academically, highlighting the need for early health interventions.

7. Do you suffer from illnesses?

Year	No	Yes
Year 1	84.05%	15.95%
Year 2	71.23%	28.77%
Year 3	69.14%	30.86%
Year 4	64.29%	35.71%
Year 5	36.54%	63.46%

Figure 7

8. Do you have any of the following medical condition/s?

Count of Do you have any of the following medical condition/s?
year 1

Count of Do you have any of the following medical
condition/s?Year 2

Count of Do you have any of the following medical condition/s?
year 3

Count of Do you have any of the following medical condition/s?
year 4

Count of Do you have any of the following medical condition/s?
year 5

9. Do you have a history of cancer?

Year	Yes	No
Year 2	0.00%	100.00%
Year 3	3.70%	96.30%
Year 4	14.30%	85.70%
Year 5	1.90%	98.10%

Figure 8

Comment:

Cancer prevalence appears to peak in **Year 4 (14.3%)**, which may indicate a specific exposure, risk factor, or reporting anomaly in that group. The percentages are otherwise low in other years, especially in **Year 2 (0%)** and **Year 5 (1.9%)**. This suggests that cancer cases are not consistently distributed across the years and may warrant further investigation to determine possible environmental, lifestyle, or demographic factors influencing this spike in Year 4.

10. Have you undergone any previous surgeries?

Surgery Status	Year 2	Year 3	Year 4	Year 5
No Surgery	95.90%	76.50%	85.70%	79.80%
Appendectomy	1.40%	7.40%	0.00%	6.70%
Back Surgery	0.00%	0.00%	0.00%	1.00%
Eye Surgery	2.70%	9.90%	0.00%	12.50%
Cancer Surgery	0.00%	1.20%	7.10%	0.00%
Knee Surgery	0.00%	1.20%	7.10%	0.00%
Gallbladder Removal	0.00%	1.20%	0.00%	0.00%
Heart Surgery	0.00%	2.50%	0.00%	0.00%

Figure 9

Comment:

Most participants reported no history of surgery across all years, with the highest in Year 2 (95.9%). The most common surgeries were appendectomy and eye surgery, especially in Years 3 and 5. Major surgeries like cancer, heart, and knee procedures were rare, indicating a generally healthy or younger population.

11. Are there doctors or therapists who treat you?

Category	Year 1	Year 2	Year 3	Year 4	Year 5
1- doctor	65.20%	76.50%	65.90%	55.60%	55.40%
2- doctor	19.60%	14.70%	22.00%	22.20%	21.40%
3+- doctor	15.20%	8.80%	9.80%	22.20%	21.40%

Figure 10

Comment:

The data shows a consistent reliance on 1-year doctors, with lower and stable percentages for more experienced doctors, suggesting limited retention or progression.

12. Please list all the medications you are currently taking for chronic health conditions:

Category	Year 1	Year 2	Year 3	Year 4	Year 5
1- Medication	71.40%	75.00%	85.70%	20.00%	44.40%
2- Medication	15.50%	25.00%	14.30%	40.00%	27.80%
3+ Medication	13.00%	0.00%	0.00%	40.00%	27.80%

Figure 12

Comment:

The data shows that 1-Medication was dominant in the first three years but dropped sharply in years 4 and 5. In contrast, 2- and 3+ Medication categories increased notably in the last two years, indicating a shift toward more diverse or advanced medication use over time.

13. How many hours do you typically sleep each night?

Sleep Duration	Year 2	Year 3	Year 4	Year 5
Less than 5 hours	13.70%	24.70%	7.10%	14.40%
5 to 7 hours	65.80%	50.60%	57.10%	60.60%
8 to 9 hours	20.50%	24.70%	35.70%	25.00%

Figure 13

Comment:

The data shows that **5 to 7 hours of sleep** is the most common duration across all years. **Less than 5 hours** peaks in year 3, while **8 to 9 hours** increases in year 4, suggesting some improvement in sleep patterns before declining slightly in year 5.

14. How many cigarettes do you smoke on an average day?

Smoking Status	Year 2	Year 3	Year 4	Year 5
I do not smoke	97.30%	91.40%	100.00%	99.00%
6–10 cigarettes	2.70%	2.50%	0.00%	1.00%
11–20 cigarettes	0.00%	4.90%	0.00%	0.00%
More than 20 cigarettes	0.00%	1.20%	0.00%	0.00%

Figure 14

Comment:

The data shows that the vast majority of individuals do not smoke across all years, with rates consistently above 91%. Smoking is minimal, and heavier smoking (11+ cigarettes) is nearly nonexistent, indicating a generally low prevalence of smoking in the population.

Frequency	Year 1	Year 2	Year 3	Year 4	Year 5
Daily	13.40%	28.20%	16.00%	21.40%	14.40%
Several times a week	39.30%	42.30%	23.50%	28.60%	23.10%
Once a week	14.80%	16.90%	19.80%	14.30%	19.20%
Rarely or Never	32.50%	12.70%	40.70%	35.70%	43.30%

III. Dietary and lifestyle Habits

15. How often do you buy organic foods?

Figure 15

Comment:

Year 2 students show the highest interest in buying organic food, while Years 3 and 5 have the most who rarely or never purchase it. Other years show moderate buying habits.

16. How often do you eat vegetables per week?

Frequency	Year 1	Year 2	Year 3	Year 4	Year 5
Daily	35.30%	37.00%	27.20%	28.60%	32.70%
Several times a week	44.40%	45.20%	54.30%	57.10%	43.30%

Once a week	13.40%	9.60%	12.30%	7.10%	13.50%
Rarely or never	6.80%	8.20%	6.20%	7.10%	10.60%

Figure 16

Comment:

Most participants **eat fruits and vegetables several times a week**, followed by **daily consumption**. **Rare or no intake** is minimal, indicating generally healthy eating habits across the years.

17. How often do you eat fruits per week?

Frequency	Year 1	Year 2	Year 3	Year 4	Year 5
Daily	35.30%	19.20%	28.40%	7.10%	19.20%
Several times a week	44.40%	54.80%	44.40%	71.40%	46.20%
Once a week	13.40%	13.70%	18.50%	7.10%	22.10%
Rarely or never	6.80%	12.30%	8.60%	14.30%	12.50%

Figure 17

Comment:

Most participants consume fruits and vegetables **several times a week**, with **daily intake** being common in earlier years. **Rare consumption** is minimal, indicating generally positive dietary habits.

18. How often do you eat red meat per week?

Frequency	Year 2	Year 3	Year 4	Year 5
Daily	6.85%	11.11%	0.00%	2.88%
Several times a week	57.53%	54.32%	50.00%	54.81%
Once a week	24.66%	24.69%	42.86%	34.62%
Rarely or never	10.96%	9.88%	7.14%	7.69%

Figure 18

Comment:

Red meat is most consumed **several times a week**, while **daily intake is low**, and a small proportion of students consume it **rarely or never**.

19. How often do you eat poultry per week?

Frequency	Year 2	Year 3	Year 4	Year 5
Daily	13.70%	14.81%	0.00%	5.77%
Several times a week	53.42%	51.85%	85.71%	63.46%
Once a week	23.29%	23.46%	14.29%	17.31%
Rarely or never	9.59%	9.88%	0.00%	13.46%

Figure 19

Comment:

Poultry is mainly consumed several times a week across all years, with minimal daily intake. Rare or no consumption is low, indicating moderate to high preference for poultry among students

20. How often do you eat fish per week?

Frequency	Year 2	Year 3	Year 4	Year 5
Daily	0.00%	7.40%	0.00%	0.00%
Several times a week	24.70%	16.00%	14.30%	13.50%
Once a week	41.10%	38.30%	57.10%	45.20%
Rarely or never	34.20%	38.30%	28.60%	41.30%

Figure 20

Comment:

Fish is mainly consumed once a week, followed by rare or no consumption. Daily intake is negligible, indicating limited regular fish consumption among students.

21. How often do you eat processed/canned meat/fish per week?

Frequency	Year 2	Year 3	Year 4	Year 5
Daily	5.50%	9.90%	0.00%	1.90%
Several times a week	27.40%	24.70%	7.10%	15.40%
Once a week	26.00%	28.40%	28.60%	17.30%
Rarely or never	41.10%	37.00%	64.30%	65.40%

Figure 21

Comment:

Processed food consumption is frequent among students, with most reporting intake several times a week. Daily consumption is low, but overall intake remains high, especially in later years.

22. How often do you eat high-fat or fried foods?

Frequency	Year 1	Year 2	Year 3	Year 4	Year 5
Daily	22.80%	6.80%	14.80%	7.10%	9.60%
Several times a week	40.50%	27.40%	42.00%	35.70%	51.00%
Once a week	25.10%	52.10%	25.90%	35.70%	27.90%
Rarely or never	11.70%	13.70%	17.30%	21.40%	11.50%

Figure 22

Comment:

Fried food consumption is frequent among students, especially in later years, with most consuming it several times a week. Daily intake is low, while once-a-week consumption is common in Year 2.

23. How often do you eat foods high in sugar/desserts?

Frequency	Year 1	Year 2	Year 3	Year 4	Year 5
Daily	16.81%	15.07%	16.05%	14.29%	13.46%
Several times/week	37.89%	45.21%	41.98%	50.00%	40.38%
Once a week	26.50%	27.40%	24.69%	28.57%	31.73%
Rarely or never	18.80%	12.33%	17.28%	7.14%	14.42%

Figure 23

Comment:

Most students consume sweets several times a week, especially in Years 2 and 4. Daily consumption is moderate, while a notable minority report once-a-week or rare consumption. Overall, the trend suggests frequent intake of sweetened foods among students.

24. How often do you eat Baladi bread?

Frequency	Year 2	Year 3	Year 4	Year 5
Daily	42.50%	46.90%	50.00%	52.90%
Several times a week	38.40%	24.70%	28.60%	28.80%
Once a week	9.60%	22.20%	14.30%	2.90%
Rarely or never	9.60%	6.20%	7.10%	15.40%

Figure 24

Comment:

Bladi bread consumption among students is mostly daily, increasing to over half by Year 5. Several times a week is the next common frequency, while few students eat it rarely or never. This shows bladi bread is a regular part of students' diets.

25. What type of fat do you always use in cooking?

Type of Fat/Oil	Year 2 (%)	Year 3 (%)	Year 4 (%)	Year 5 (%)
Corn oil	27.40%	18.50%	28.60%	17.30%
Natural butter	20.50%	18.50%	7.10%	26.00%
Olive oil	26.00%	21.00%	7.10%	8.70%
Margarine	5.50%	4.90%	0.00%	1.00%
Cotton seed oil	2.70%	8.60%	7.10%	3.80%
Sunflower oil	17.80%	28.40%	50.00%	43.30%

Figure 25

Comment:

Sunflower oil is the most used fat among students, especially in Year 4 and Year 5. Corn oil and olive oil are also popular, particularly in earlier years. Natural butter use increases significantly by Year 5. Margarine and cotton seed oil are the least used

26. At what level do you estimate your daily physical activity?

Physical Activity Level	Year 2	Year 3	Year 4	Year 5
Low	34.20%	32.10%	21.40%	43.30%
Moderate	57.50%	64.20%	64.30%	52.90%
High	8.20%	3.70%	14.30%	3.80%

Figure 26

Comment:

Moderate physical activity is the most common across all years, while high activity remains consistently low. Notably, low activity increases significantly in Year 5, suggesting a decline in physical engagement.

27. Do you have a regular fitness routine?

Activity	Year 2	Year 3	Year 4	Year 5
None	43.80%	32.10%	28.60%	44.20%
Walking	34.20%	45.70%	50.00%	43.30%
Gym exercises	16.40%	17.30%	14.30%	6.70%
Sport	5.50%	4.90%	7.10%	5.80%

Figure 27

Comment:

Many students are inactive, especially in Years 2 and 5. Walking is the most common activity, while gym exercises and sports are less popular. Overall, inactivity remains high.

IV. Women's health, Are your periods regular?

Period Regularity	Year 1	Year 2	Year 3	Year 4	Year 5
Yes	78.60%	79.10%	83.70%	80.00%	81.60%
No	21.40%	20.90%	16.30%	20.00%	18.40%

Figure 28

Comment:

Most participants across all year's report having regular periods, with percentages consistently above 78%, indicating general menstrual regularity in the population studied.

V. Student's self-evaluation information:

Question	Year 2 Agree	Year 2 Disagree	Year 3 Agree	Year 3 Disagree	Year 4 Agree	Year 4 Disagree %	Year 5 Agree %	Year 5 Disagree %
Q1: I feel happy with my life	90.40%	9.60%	84.00%	16.00%	78.60%	21.40%	84.60%	15.40%
Q2: I feel calm and relaxed	76.70%	23.30%	63.00%	37.00%	50.00%	50.00%	52.90%	47.10%
Q3: I feel supported and connected to my family and community	93.20%	6.80%	78.80%	21.20%	85.70%	14.30%	80.80%	19.20%
Q4: I feel financially stable and secure	93.20%	6.80%	79.00%	21.00%	83.30%	16.70%	73.10%	26.90%

Question	Year 2 Agree	Year 2 Disagree	Year 3 Agree	Year 3 Disagree	Year 4 Agree	Year 4 Disagree	Year 5 Agree	Year 5 Disagree
Q5: I have a purpose in life that I am working to achieve	90.40%	9.60%	85.20%	14.80%	100.00%	0.00%	86.50%	13.50%
Q6: I have confidence in my opinions	89.00%	11.00%	72.80%	27.20%	78.60%	21.40%	80.80%	19.20%
Q7: For me, life has been a continuous process of learning, changing, and growth.	94.50%	5.50%	88.90%	11.10%	100.00%	0.00%	92.30%	7.70%

Figure 29/a

Figure 29/B
