

SCREENING INTEGRATIVE HEALTH REPORT FOR SEKEM EMPLOYEES

Integrative Health Center
July/2024

Purpose:

Health screening programs are crucial tools to figure out persistent population health problems. It can be challenging for employees to maintain a healthy lifestyle for various reasons. These may include long days sitting in an office chair, repetitive physical movements causing strain on the body, or sustained stress leading to burnout and fatigue. A crucial first step in preserving a healthy workplace and promoting employee wellbeing is conducting corporate health screening. Businesses have a significant influence on reducing a variety of community health problems. Early identification of health risks results in reduced absenteeism, increased productivity, and earlier interventions as well as demonstrating concern for staff well-being.

Description:

The Integrative health screening program was designed to evaluate the health and well-being of each client or patient. by thoroughly assessing their lifestyle, medical, and therapeutic needs as well as three laboratory tests (CBC, random glucose test, urine test). Personalized recommendations can be provided to help employees achieving better health. This service is offered regularly to all employees of SEKEM Holding, SDF and HU, focuses on empowering individuals to become healthier and happier versions of themselves.
